# IC W20\_thermoelasticity Highlight: Dynamic strength - shear modulus scaling for tantalum at extreme pressures

Leonid Burakovsky (PI), T-1, Daniel Blaschke, XCP-5,  
and Dean Preston, XCP-5

**Fig. 1.** Pressure dependence of the shear modulus of Ta for two fundamental curves: the 300 K isotherm and the Hugoniot.

**Fig. 2.** Scaling of the high pressure strength ( $Y$ ) of Ta with shear modulus ( $G$ ). The dashed curve represents a hypothetical  $G$  which is fit such that the linear scaling approximation matches the data.
